Curious Kids: why has nobody found any life outside of Earth?

It's likely that if such a planet exists, it will be outside our Solar System, along with the other planets (like Mars).

Planet Earth facts and information

According to the theory, the earth is being destroyed. Theories included the solar crisis, the extinction of honey bees, the change of magnetism poles, and etc.

All of this adds up to one uncomfortable fact: the amount of energy that reaches the Earth is very slowly increasing over time. However, a number of factors are at play. A spacecraft enters orbit when its centripetal acceleration due to gravity is less than or equal to the centrifugal acceleration due to the horizontal component of its velocity.

It was replaced by Albert Einstein's theory of special relativity which holds

Explore music. Beneath the mantle lies the core. Even accounting for all the other factors, including the slower-moving Earth around the Sun, we'd have to change the Earth's orbital energy by 4.

Willie Rohrer. Take Action. Intergalactic space is the physical space between galaxies.
