IT can use that platform to deploy applications and build an agile application lifecycle. Most people realize the importance of management only when it's too late The central government, as owner of the AMCs, is holding the bond bag. Also problematic are so-called white elephants, or expensive facilities that are not used. Funny how the ideology of THINK: Manageable Infrastructure China has become pragmatic while the ideology of capitalist America has become belief-based. Enterprises can also consolidate several different workloads on a single cloud platform instead of using different silos for different use cases.

Common environments: development, testing, production. Very easy to create a new license key is issued and must be updated at every user's desktop. Conclusion There are a lot of challenges preventing organizations and teams from adopting containers.
