Paracelsus –a German-Swiss doctor, scholar, and occultist, pioneered the use of minerals and chemicals in the body. It started, they say, in the lower Volga at Sarai, the capital of the Khanates of The Golden Horde and once it reached Genoese trading stations it spread by boat. Common problems at this time included smallpox, leprosy, and the Black Death, which continued to reappear from time to time.

Albuquerque;UniversityofNewMexicoPress,IntheMiddleAges,peoplereस्प

He was one of the pioneers in the study of biomechanics.
