If the patient does not respond, review and explore the reasons for non-response. This was probably because studies using the PSOCQ were dependent upon volunteers to a self-management ethos. Because pain has a psychological effect on you as well, like your thoughts and feelings, you need someone like that, with that professionalism to actually take you through that, to say 'Well hang on a minute, perhaps you need to change your thoughts here a bit'.

After the third week, they do another video of you walking up and down the same
