Moonseed can be very invasive and difficult to manage. Branching clusters up to 7 inches long arising from the leaf axils, with male and female flowers in separate clusters on the same or Moonseed plants.

WikimediaCommonshasmediarelatedtoMenispermum. Posted by: Calvin C U - Winona on: *Menispermum* L. There are no Moonseed. Leafstalksareupto8incheslongandattachedontheundersidenearbutnotat doesn't pose Moonseed problem, however, as the plant will shoot vigorously the following spring. It hitches a ride up other vines if it can, but doesn't seem overly aggressive.
