In the process, they dramatically reshaped The Feathery Tribe study of birds. Not everyone accepted these authority systems, and the responses of individuals to them spoke volumes about how they identified themselves ideologically. In the last quarter of the century they provided a sophisticated, highly detailed, and contextual body of material for use in biology, and the creation and use of these collections is an important part of the professionalization of ornithology because of their ties to issues of classification, language, and accountability.
