The daily or weekly bid-ask spread can be computed as the average of the bid price less ask price observations during the period. Provide the following data on respective markets for the last three years, if available: . TargetAudience. To facilitate comparison of bid-ask spreads across assets of differing value, the Guide recommends that bid-ask spreads be expressed as a percentage of the midpoint of the bid and ask price of the asset. Selected experts from national central banks, who have participated actively in various international groups that have identified the need to improve data on securities markets, have also been invited to contribute to the deliberations of the WGSD. Exposures are likely to build up on the asset side of the balance sheet as against the

liability .

A weighted average of all bid-ask prices, not just the best in the market, can

Guide considers that for the production of time series, the data for the shortest period available should be used for example, quarterly data.
