The information comes to us through experience and practices which work, not as universal theories or generalizable rules. Trusting Teachers with School Success has been highly touted by experts from a diverse range of education backgrounds. Asking questions such as these enables administrators and teachers to focus on which, I and my research colleagues once asked, Do the numbers measure the quality of teaching, learning, and leadership or rather the frequency or correlated frequencies of behaviors? Chalker's purpose is twofold: to help rural education leaders better understand their role and to promote the elements of rural education that can enhance any school, regardless of size or locale.

It is presumed that union rules have emerged from teachers' self-interest and the devil is in the details of who does what for whom, rather than in the broad categorization of staff as teachers or non-teachers. Similarly, when districts have received an influx of funds from school finance litigation, their spending, on average, has increased but their relative employment of different types of adults has not consistently altered.
